Dear Sirs

The attached statement by a very wise Ms Dorothy Hoverd summarises the situation and the rejection of the accounts.

I am compiling a scathing account of the unjust, obnoxious, covert, underhanded, sneaky, cowardly, hostile and deceitful conduct of the Public Trustee, Treloar & Treloar and the Probate office towards totally innocent persons viz myself, my mother Erini Stiliano, my daughters, my sister Stella and my granddaughters Sara & Shamona.

The probate meddling, Greek sovereignty and inheritance violations, botched Summons, botched serving of Summons, botched selective listing of defendants, and botched defendantless outrageous & hilarious court hearings, filled with deception by Treloar & Treloar, and fiddling of account item descriptions will just a few of the maladministrations featured.

How dare you warmongers destroy my innocent family, loot the estate accounts, expose the overseas estate property to claiming by villagers, get yourselves routed in court by your own incompetence and stupidity, then have the nerve to bill the estate after all your malicious ineptness.

Did you ever do one *legal honourable* thing that benefited the beneficiaries or testator? How much of the applicable laws in the SA Inheritances Act, the SA Admin and Probate Act and Trustee Act did you evade and dodge and manoeuvre?

As you should be aware, the accounts items were entirely driven by the Executors plan to defraud the estate of property number 671 overseas. The plaintiff's two main affidavits were replete were perjuries and forgeries designed to stall issue of probate to Greece, so that 671 fraud could succeed. In the Guardianship Board hearings and District Court hearing, the transcripts provide, to the astute observer, hard evidence and exposure of future fraudulent intent.

Gary Stiliano had better distance himself from the fraud organised by Anna's husband and their overseas lawyer Mr Salamastrakis, make a confession, and thereby force the refund of monies to Ms Theofilis received illegally from the sale of my inheritance (property 671).

These matters have been comprehensively presented to the SA Police (SAPOL) and to the Anti-Corruption Branch(ACB) of SAPOL. The Public Trustee instructed the SA Police not to investigate, without my knowledge, and this itself should be a matter for the ACB and the current Parliamentary Steering Committee action on Public Trustee Reform.

It is time a massive deterrent fund was raised, contributed to by millions of Australian testators and future beneficiaries, to protect their testament and inheritance against this sort of

irresponsible behaviour by persons who think a deceased estate is something that they can control and have a piece of by any unethical means.
