Subject: I need memory

Hi Dad

I need some help. I've been trying to open some things in Internet Explorer but it keeps coming up that I don't have enough memory and to close some files or delete some programs of my hard disk.

I usually only have one Window open when I'm doing this (Internet Explorer) and as for deleting I don't know what I can and can not delete. Can you help me tidy up my system so I can do these things, when you bring the printer.

Thank you and I'll speak to you soon.
